# Returning Your Lost Property to You!

## Lose Something?

Have you ever lost, or accidentally misplaced your cell phone, keys, camera, luggage or other personal items? About the only thing worse than your loss, is the inconvenience associated with replacing the lost property. How do you replace files on your laptop or pda?

Tracer Tags developed a system that puts control back into your hands, substantially increasing the chances of recovering your lost items. By placing Tracer Tags on your personal property, you identify your property as yours without jeopardizing your privacy.

## How Does It Work?

It's as easy as 1-2-3!

**1. Activate the tags.** The tags can be activated online at the web site or by a toll free telephone number. The tag number matches the contact information without compromising the user's privacy. All Tracer Tag products come with a full one-year, renewable activation period.

**2. Attach the tags to the items you want to protect.**

**3. Get lost items back.** When attached to one's possession, such as luggage, golf clubs, a cell phone, snowboard, etc., and activated, when the item with the tag number is reported found, the owner is contacted by Tracer Tags so they can make arrangements to get their lost property back. Tracer Tags rewards the finder.

Products shown above are 50% of actual size.

## Combo Packs Golf, Travel, Mini

Tracer Tags combines a highly secure database system with uniquely numbered personal property tags, and products, that you apply to your possessions. When the tagged item is found, you are contacted without compromising your privacy.

For security and privacy issues, we never give out, share or publish activated tag contact information.
